

Zwick Science Award and Academia Day

Zwick Science Award 2018

Have you realized interesting scientific papers (already published or not) dedicated to materials testing? Zwick awards this recognition to authors of scientific papers on the most innovative uses of materials testing machines. The submission deadline is 31th December 2018.

Prizes

- First place: Paul Roell Medal and €5,000
- Second place: €2,000
- Third place: €1,000

We look forward to receiving your application.

Zwick Science Award history

- 500 participants
- 310 universities
- 55 Countries
- papers from the field of materials science, engineering, chemistry, medical, biology, construction, building materials

Selected papers will be published.

FAQ

Who can participate?

Any author of a scientific paper (no matter if she/he is still at the university).

What scientific works can be submitted?

You can participate with nearly every work, e.g. research or conference articles, posters and scientific papers (published or in preparation). You can submit more than one work.

What kind of document should I send if I want to participate?

The paper (max. 15 pages), conference article or poster, a short CV and if available pictures and/or videos.

What kind of document should I send if my work is a graduation thesis?

As our panel of judges is not able to read a full thesis, a paper is always preferred. If the author is able to make a summary in English of not more than 10 pages summarizing the “materials testing” part of the thesis it will be accepted too.

Can I only participate when a Zwick testing machines was used?

No, every brand of materials testing machines can be used in the scientific work.

How old can the paper be?

If the content of your work is still valid, the age of the publication is not important.

How will the winners be determined?

A jury (1 Zwick employee, 3 professors) will nominate the winners.

Zwick Academia Day

Materials research is vital to a competitive economy. As the leading manufacturer of testing systems, Zwick promotes and fosters the exchange of information with academic institutions and industry research groups. Presentations and workshops are the ideal forum for this. That is why Zwick has sponsored Zwick Academia Day for many years. It takes place every spring at a different international university or institutions of higher education.

This event gives us an opportunity to recognize how materials testing machines are used in many innovative applications. Zwick Academia Days of the past have served as a platform for the rigorous exchange of ideas and opinions among participants. The mix of participants from science and industry makes this event special, always ensuring there is a direct connection between theory and practice.

Zwick Academia Day 2018, 15th May, Rome Call for participants

Topic: *Testing of high performance, lightweight and sustainable materials*

University: Sapienza, Università di Roma

Speakers: Lectures by remarkable professors from the best international universities that will join the event. The detailed program will be communicated soon.

Agenda: Lectures, discussions, poster session, rewarding of the Zwick Science Award

Social program: Guided tour of Rome and pre-event dinner

***NEW* Call for posters - Free participation, mandatory registration**

Submit your original work dedicated to testing of high performance, lightweight and sustainable materials. Send your short abstract in English, max 500 characters spaces included to robert.strehle@zwick.com by 15th March 2018.

The selected ones will take part to the poster session in Rome and will be published.
