Second Edition

September, 21 to 23, 2016
Capri, Italy

Organized by

European Association of Material Surfaces
Science & Technology

Overview and objectives of Symposium

EMASST has pleasure to invite you to participate in the **2nd edition of European Symposium on Surface Science** to be held at Capri island, Italy, September 21-23, 2015.

The symposium provides a comprehensive overview of the state-of-the-art in material science, surface physics and chemistry, focusing on discussions related to the recent advances and current challenges, while pointing out the prospective interdisciplinary development of the six industrial fields covered by **EMASST**.

The **European Symposium on Surface Science** will be a unique event to encourage an unprecedented international cross-collaboration amongst research world and industrial world on fundamental and applied surface sciences.

The conference will consider various and new developments, both from an experimental and computational viewpoint. Special emphasis will give to the application of advanced theoretical and experimental approaches as well as multiscale and multidisciplinary approach. In particular the presented novelties will be focused on the potential application and on the industrial fallout.

Main Subjects and Topics

Oral and poster contributions must cover the six one of the following industrial areas: aeronautical and aerospace, mechanical, energy, electric and electronic, biomedical, chemical.

In these six areas will be taken into account contributions on:

- **Smart Coatings**
- **Surface modification**
- **Nanotechnology and Nanomaterials**
- **Surface characterization**
- **Surface phenomena on 3D Printing Process**

Publication of contributes

Activities presented as oral communication or poster could be submitted as short papers and presented at the symposium. They will be permanently archived in the eLibrary of the EMASST website where they are easily accessible to the international scientific community.
